Docket No. UF-155CD3
Serial No. 10/627,886

Accordingly, please amend the Official Filing Receipt to recite the continuing data claimed above and provide the undersigned representative with a corrected Official Filing Receipt. A redlined copy of the Filing Receipt as received from the U.S. Patent and Trademark Office, a copy of the first page of the specification as filed, and newly executed Declarations/Powers of Attorney forms accompany this request.

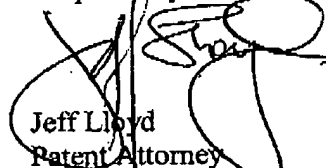

Please also note updated inventor address information on the Declarations/Powers of Attorney documents and update the Official Filing Receipt accordingly.

No fees are believed due in connection with this request. However, should fees be found to be due in respect thereof, the Assistant Commissioner for Patents is hereby authorized to charge such fee or fees to counsel's Deposit Account No. 19-0065.

If any further information or documentation is required in order to accede to this request for a corrected Filing Receipt, the Office is respectfully requested to contact the undersigned by telephone at (352) 375-8100.

Thank you for your attention to these matters.

Respectfully submitted,

Jeff Lloyd

FILING RECEIPT

OC000000012149070

Date Mailed: 03/22/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Novel polypeptides and polynucleotides relating to the alpha- and beta-subunits of glutamate dehydrogenases and methods of use

Preliminary Class
800

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Cross-Reference to a Related Application

This application is a continuation application of co-pending application Serial No. 09/070,844, filed May 1, 1998 which is a divisional application of co-pending application Serial No. 08/725,596, filed October 3, 1996 (now abandoned), which is a continuation-in-part of co-pending application Serial No. 08/541,033, filed October 6, 1995 (now U.S. Patent No. 5,879,941, issued March 9, 1999).

Background of the Invention

Inorganic nitrogen acquired by plants is ultimately converted to ammonium before being assimilated in organic nitrogen metabolism. One enzyme postulated to be involved in the assimilatory process is glutamate dehydrogenase (GDH), a group of ubiquitous enzymes found to be present in almost all organisms from microbes to higher plants and animals (Srivastava, H.S., R.P. Singh [1987] *Phytochem.* 26:597-610). GDH catalyses the reversible conversion of α -ketoglutarate to glutamate via a reductive amination that utilizes reduced β -nicotinamide adenine dinucleotide (NADH) or reduced β -nicotinamide adenine dinucleotide phosphate (NADPH) as a cofactor. The role of plant GDHs in the assimilation of ammonium into amino acids has been questioned since the discovery of the glutamine synthetase/glutamate synthase (GS/GOGAT) pathway that is believed to be the favored pathway for ammonium assimilation in higher plants (Mifflin, B.J., P.J. Lea [1976] *Phytochem.* 15:873-885).
